

SP-FSA5 series

电脑平缝机 Computerized Lockstitch Machine

腔体长度 305mm, 超大操作空间, 西服、棉服、羽绒服及小模板等缝制面料都能轻松顺畅;
Throat Length is 305mm, providing an extra-large working space, enabling smooth and effortless sewing of fabrics such as suits, cotton garments, down jackets, and small templates.

性能优势:

A5 系列电脑平缝机为平板式机体, 采用计算机控制系统用单直针刺料、连杆挑线, 旋梭勾线, 下送料结构; 实现自动调速、自动停止、自动停针位、自动剪线、自动抬压脚、自动计数、自动倒顺缝、自动加固缝及慢启动等功能。减去倒缝扳手, 采用步进电机驱动倒缝及针距, 倒缝无声且线迹完美, 针距精度到 0.1mm, 锁定针距调节功能, 避免随意调节针距; 超大的操作空间, 缝料输送更顺畅; 根据服装工艺要求, 选择不同花样线迹缝纫, 且可自行编辑所需花样, 给你时尚美观的线迹;

适用范围:

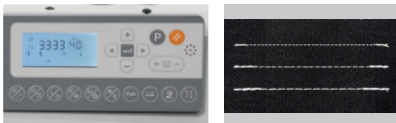

主要用于薄料针织、内衣、衬衫、制服等, 厚料用于各类运动服、牛仔服、时装、大衣、鞋帽、皮仔、箱包等。

Advantages

The A5 series computerized lockstitch sewing machine features a flatbed design and utilizes a computer control system. It uses a single straight needle for material stitching, with a connecting rod thread take-up and a rotary hook thread loop structure. It incorporates functions such as automatic speed adjustment, automatic stop, automatic needle position stop, automatic thread trimming, automatic thread wiper, automatic stitch counting, automatic foot lift, automatic reinforcement stitching, and slow start. By eliminating the need for a reverse sewing lever, it employs a stepper motor to drive the reverse sewing and stitch length adjustment, resulting in silent and perfectly formed reverse stitches. The stitch length accuracy reaches 0.1mm, and there is a lock function for stitch length adjustment, preventing random changes in stitch length. The machine provides a spacious working area, ensuring smooth fabric feeding. It allows for sewing various decorative patterns and allows users to edit their desired patterns, providing stylish and aesthetic stitch lines.

Application

The machine is primarily used for thin knitted fabrics, underwear, shirts, uniforms, etc. For thick fabrics, it is suitable for sports apparel, denim garments, fashion garments, coats, footwear, leather goods, luggage, and more.

针距精准 Precise Stitch Length
步进电机控制针距, 精度 0.1mm, 可根据工厂需要, 锁定针距调节功能, 避免误调;
Stitch length controlled by a stepper motor, with an accuracy of 0.1mm. It features a stitch length lock function, allowing for precise adjustment according to factory requirements and preventing accidental changes.

双刀剪线 Dual Knife Thread Trimming
双刀剪线机构, 线迹美观线头短, 不用剪线头, 缝物结束线头在 3.5mm 内;
无: 单刀剪线 (标配) None: Cut cables with a single knife (standard)
S: 双刀剪线 (选配) S: Cut the wire with two knives (optional)
Trimming mechanism ensures neat thread trimming and short thread tails. There is no need to manually trim the thread tails. The thread tails are kept within 3.5mm after the sewing process is completed, resulting in a clean and tidy finish.
